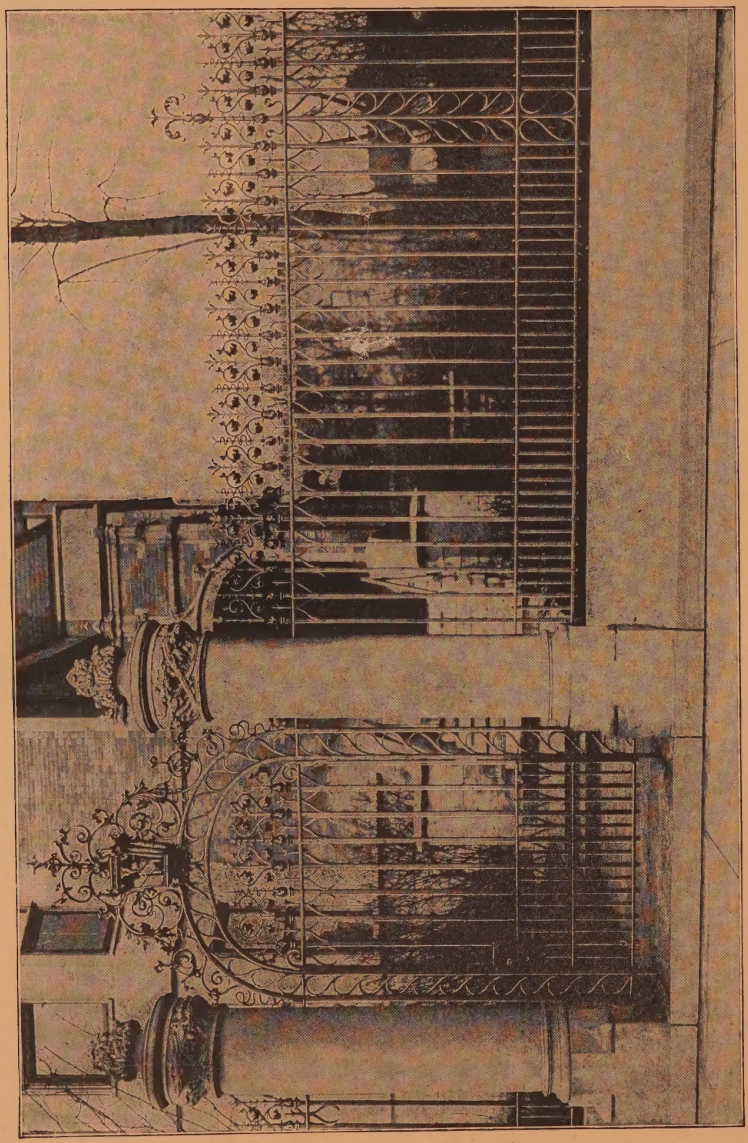
ART METAL WORK IN BRASS, STEEL AND IRON.

Copyright 1897, 1903 and 1909 by F. P. Smith.



Ornamental Iron Fence, Gates and Lamps Furnished by us for Residence of Mr. L. Klein, Grand Boulevard and Forty-fourth Street, Chicago.
Frederick W. Perkins, Architect.

Special Notice.—The copying by photography, tracing, or otherwise—either entirely or partly—of the following cuts constitutes an infringement of our copyright. Parties infringing will be rigorously prosecuted.

OUR SHOPS AND FOUNDRY

are located at Clybourn and Fullerton Avenues and Chester Street, Chicago, on the C., M. & St. P. and the C. & N.-W. Railways, with switch into factory. They are the largest in the country for our kind of work, and are provided with all the latest appliances for quickly and economically fabricating our several lines of products in iron, brass and bronze; we have added many special devices relating to the manufacturing of IRON FENCES, of which we make a specialty.

We contract yearly for many thousand tons of steel with the Rolling Mills and are thus able to obtain the lowest possible prices on the raw material; we have at all times on hand an unusually large stock of the various steel sections required for our work, enabling us to fill orders of any size without delay.

The designers and mechanics of our IRON FENCE Department have specialized in this line for many years past.

We may therefore be allowed to say, without exaggerating, that we are in an exceptional position to fill our customers' wants in this line with accuracy, rapidity and economy that cannot be equaled by would-be competitors, who have no shop of their own, or are not in position to buy their material at best advantage.

All our IRON FENCES are fitted complete in our shops, painted by our special dipping process, which thoroughly covers all joints, and marked so that out-of-town customers can easily assemble and erect them.

We have been in business for over twenty-five years, and have sold work of this kind, both plain and ornamental, all over the country, and take pleasure in mentioning among the great number of Ornamental Iron Fences of special design the high grade work furnished for the following customers:

Mr. John. J. Mitchell, Woodlawn Avenue and 50th Street, Chicago.
Mr. Marvin Hughitt, No. 2828 Prairie Avenue, Chicago.
Mr. Martin A. Ryerson, Drexel Boulevard and 49th Street, Chicago.
Mr. A. C. Bartlett, No. 2720 Prairie Avenue, Chicago.
Mr. John R. Thompson, No. 4415 Grand Boulevard, Chicago.
Mr. L. Klein, Grand Boulevard and 44th Street, Chicago.
Mr. E. F. Swift, No. 2904 Prairie Avenue, Chicago.
Mr. John B. Mallers, Drexel Boulevard and 44th Street, Chicago.
Mr. N. W. Harris, No. 4520 Drexel Boulevard, Chicago.
Mr. E. M. Barton, No. 4923 Woodlawn Avenue, Chicago.
Mr. Thomas Carey, No. 4427 Grand Boulevard, Chicago.
Mr. J. W. Kiser, Michigan Avenue and 34th Street, Chicago.
Mr. G. Edwin Jones, No. 43 22d Street, Chicago.
Mr. Thomas Gahan, No. 4913 Grand Boulevard, Chicago.
Mrs. Nelson Morris, Indiana Avenue and 25th Street, Chicago.
Mrs. John J. Borland, No. 2616 Prairie Avenue, Chicago.
St. Xavier's Academy, Cottage Grove Avenue and 49th Street, Chicago.
Chicago Orphan Asylum, Grand Boulevard and 51st Street, Chicago.
St. Joseph's Church, 48th and Paulina Streets, Chicago.
Mr. M. H. Wilson, Evanston, Ill.
Mr. George W. Jackson, Austin, Ill.
Mr. E. H. Gary, Wheaton, Ill.
Mr. John S. Keefe, Oak Park, Ill.
Mr. M. A. Richardson, Oak Park, Ill.
Pennsylvania Railroad Company.
Chicago & North-Western Railroad Company.
Illinois Central Railroad Company.
Lake Shore & Michigan Southern Railroad Company.

Our guarantee and business reputation (maintained for over a **quarter of a century**) is behind every order we turn out, and we believe a satisfied customer is the best possible advertisement.

We have an investment of nearly half a million dollars in the most modern plant, foundry, machinery, etc.,

We strongly recommend that parties interested, before placing their orders, should investigate as to the responsibility of the manufacturer, and we refer to any commercial agency or prominent bank or banker in the country.

The most popular of our standard pattern IRON FENCES are shown and listed on pages 3 to 18 of this catalogue. Besides these stock designs we make up to order any special design of fence or gate desired, and no pattern is too ornamental or too elaborate for us to execute to the owner's or architect's complete satisfaction. There is, of course, an endless variety of designs that can be used for this purpose, and we merely give a few suggestions on pages 8, 22, inside front cover and both sides of back cover.

For estimating cost of our standard design fences, as well as for information regarding construction and arrangement of line posts, width of gates, etc., see page 19.

Prices given in this catalogue are at our factory, Chicago. Estimates on freight charges to any destination submitted on request. If goods are desired shipped via any particular route, kindly state so in your order; otherwise we will ship by route we think best.

We also manufacture a complete line of wire and tubular fences, lawn furniture, vases, hitching posts, stable fixtures, weather vanes, roof crestings, etc.; we illustrate a few types of this class of work in the last pages of this catalogue, and will, on request, send special catalogues to interested parties, on these goods, as well as on our other lines, such as iron railings, stairs, store fronts, guards, grilles, fire escapes, wire work of all kinds, steel for concrete reinforcement, architectural brass and bronze, etc.

We particularly desire to call your attention to our new

TRIANGULAR

TRADE MARK

STEEL FENCES (PATENT PENDING) illustrated on pages 3 to 7, which we have lately put on the market with great success. These fences, while presenting the general outward appearance of our standard iron picket fences, are built on new scientific principles, effecting a great saving of material and giving a light yet massive looking construction, which combines strength with economy.

The sales of our TRIANGULAR fences are increasing daily, and anyone looking for a strong, neat and inexpensive iron fence will save time and trouble by investigating our TRIANGULAR fences.

High fences, see pages 6 and 7, which were practically prohibitive before this on account of the high cost, can now be furnished at a very low price in the TRIANGULAR designs, on account of the great saving in material and labor.

Freight charges also are considerably lower on our TRIANGULAR fences on account of their lightness, and they can be still lowered if we ship these fences K. D., and customer puts them together, which can be done with very little trouble and expense.

We thank our customers for past favors and solicit a continuance of their patronage, as well as the patronage of new customers, who may rest assured their interests will be well taken care of in our hands.

F.P. SMITH WIRE AND IRON WORKS

On account of the extra labor and material, Gates are charged extra—single Gates, $5.00; double Gates, $10.00—and measured in the Fence. All our Fences are well painted before they leave the factory, without extra charge, and are furnished with substantial iron line Posts, with ground foundations about every seven feet the entire length of the Fence. Write us for estimates, giving plat of your lot, with location of Gates, and all measurements correctly taken. Do not get a cheap, worthless Fence, when you can procure one of our popular steel ones at the same price, all painted, ready to set up.

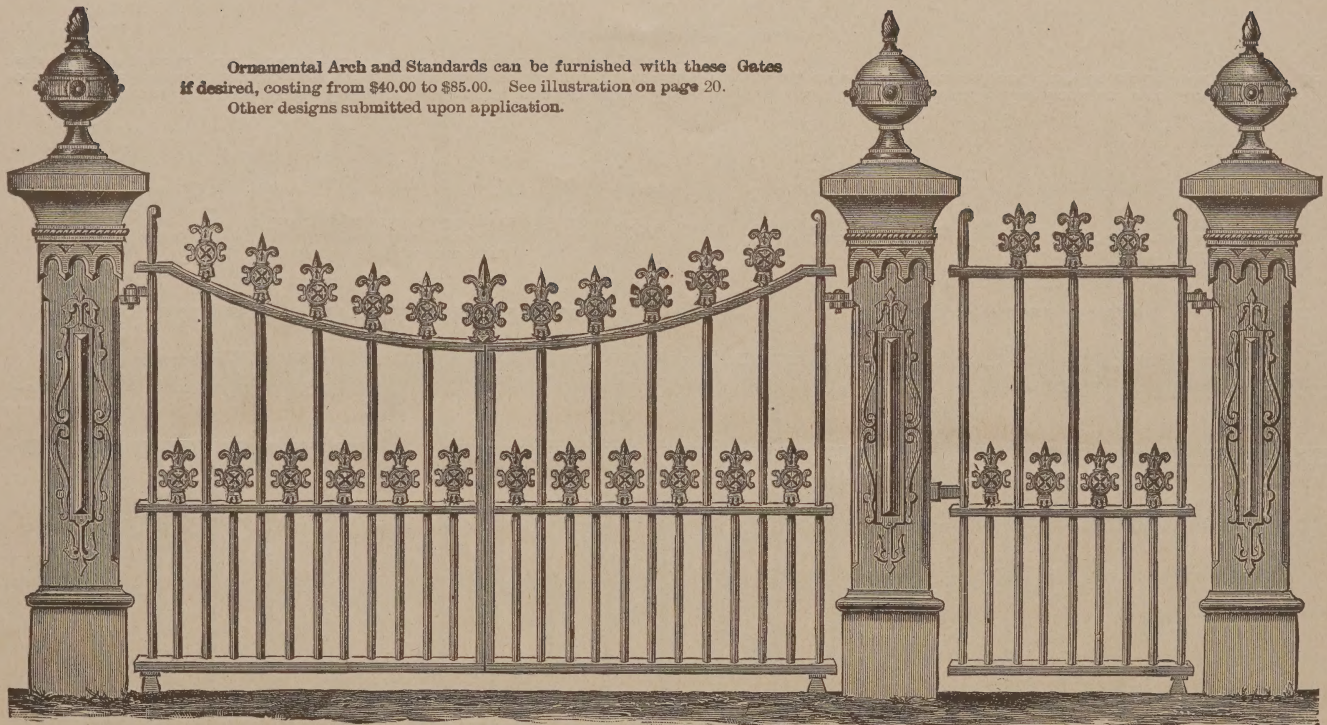
Any pattern of cast Posts or square open Posts can be substituted in place of posts shown in above cut at prices stated on other pages.

Copyright 1909 by F. P. Smith

Ornamental Arch and Standards can be furnished with these Gates if desired, costing from $40.00 to $85.00. See illustration on page 20.
Other designs submitted upon application.



No. 290 Pattern Carriage Gate, with Side Entrance.

This is a heavy wrought steel pattern, massive in appearance, and intended as an entrance gate for fine Residences, Cemeteries, Parks, etc. The usual size is 5 feet high and 9 feet opening for large Gates, and about 3½ feet for small. The posts are substantially made of cast iron, and set 3 feet into the ground upon strong cast iron foundations.

Price of Double Gate with ¾ square steel pickets, 5 feet high, without posts.....$60.00
" Single " ¾ " " 5 " " " 25.00
Price of Double Gate with ¾ square steel pickets, 5 feet high including Posts and foundations.....$140.00
" Single " ¾ " " 5 " " one Post " 65.00

Solid bronze Knobs, with improved wrought iron catches, hinges, center fastening, etc., are all included in above prices. They are the strongest carriage Gates made.

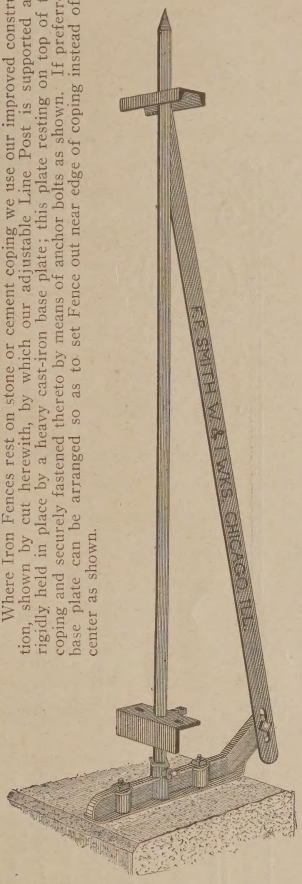
Adjustable Line Posts

This Post with spread base is used with our Fences as shown on pages 10 to 16. It is set every 7 feet throughout entire length of Fence, connecting the various panels and strengthening the Fence. The cast-iron foundation will last more than twice as long as wrought-iron when put in the ground, and the spread base will effectually resist the action of frost. The Fence is easily lined up straight and perpendicular by means of the screw and slot at G and F.

All our large handsome Posts required at gates, corners and ends have heavy spread iron bases going into the ground deep enough to resist all action of the frost.

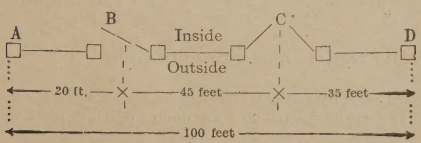
For Fences shown on the other pages we generally use the style of Line Post illustrated by cut here below, which has the same advantages as to adjustment, etc., as explained above.

Where Iron Fences rest on stone or cement coping we use our improved construction, shown by cut herewith, by which our adjustable Line Post is supported and rigidly held in place by a heavy cast-iron base plate; this plate resting on top of the coping and securely fastened thereto by means of anchor bolts as shown. If preferred, base plate can be arranged so as to set Fence out near edge of coping instead of in center as shown.



Directions for Measuring Fence, Example:

1. Give total length of Fence thus—"A" to "D" 100 feet as shown in diagram below:
2. Give distance from outside of end post "A" to center of first gate "B."
3. Give distance from center of first gate "B" to center of second gate "C."
4. Give distance from center of second gate "C" to outside of end post "D."
5. Indicate location of cast posts thus: □
6. Indicate direction gates should swing by a line drawn from the posts to which they are hinged.
7. State which is outside of fence, and if ground is level or on a grade.



Directions for Estimating Cost

Fence as per example.

100 feet No. 180 Pattern, $\frac{7}{16}$ in. Round Pickets, 32 in. high or 36 in. high when set, at 95c.	$ 95.00
6 No. 180 Cast Posts at Gates and Ends, at $5.50, including iron ground foundation	33.00
1 No. 180 Single Gate, at $5.00	5.00
1 No. 180 Double Gate, at $10.00	10.00
Total	$143.00
Less Trade Discount	

As appears in above estimate, Fence is charged at list price, per lineal foot for entire length, including line posts and foundations. Cast posts with iron foundations and gates are charged extra—posts on account of extra weight and labor. The width of gates is measured in total length of Fence, the extra charge being to cover additional labor and material, such as bronze knobs, hinges, ornamental tops, etc.

This is the only equitable method of charging for Fence, as it would be manifestly unjust to charge same net price per lineal foot for 100 feet of Fence requiring but two cast posts and no gates, as for one of 100 feet to include six cast posts and one single gate and one double gate.

Standard width of single gate is 3 feet 6 inches, and of double gate 9 feet, but they can be made any desired width.

Extra charge is made, according to additional labor involved, for exceptional grades, curves and irregularly shaped pieces.

If Fence is to set on stone coping, give width and height of stone.

No. 291 Cemetery Entrance Gates with Arch.

Designed particularly for Cemetery or Park Entrances Usual distance between Posts is 9 feet, but any desired width can be furnished. See Page 14 for Fence to match Gates.

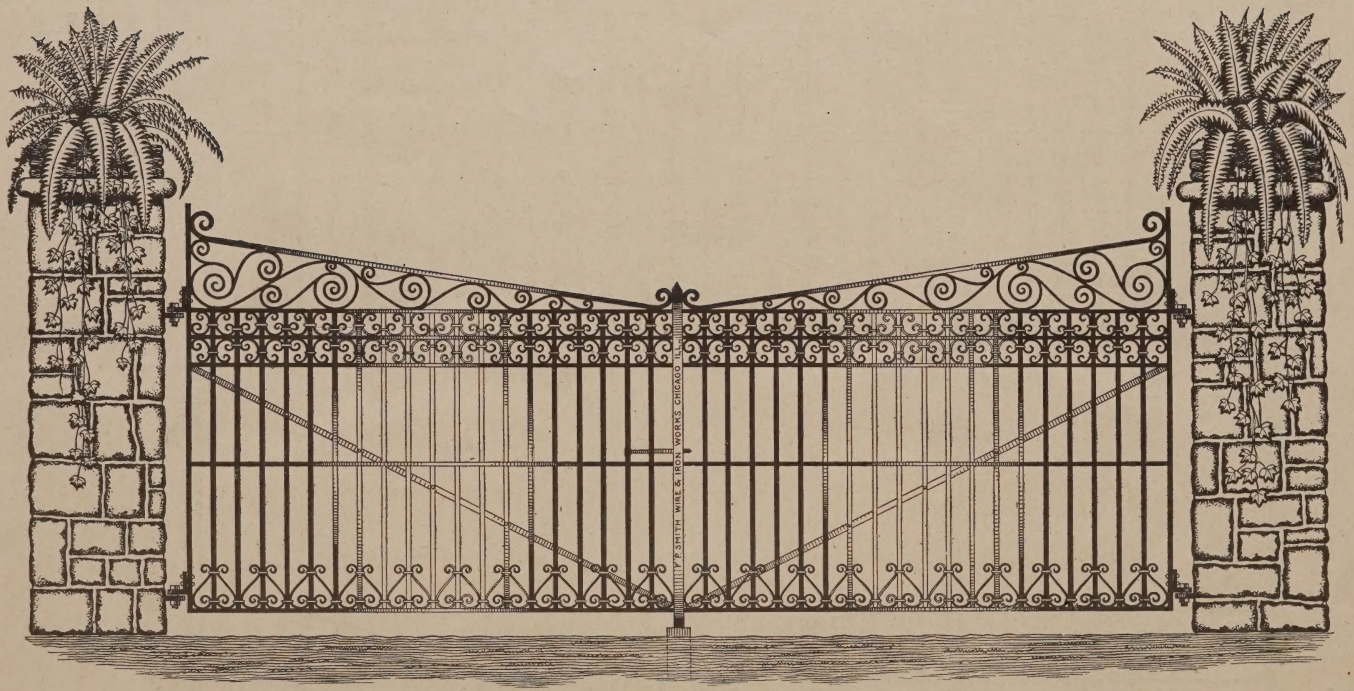
				Square Pickets.
Price of Gate with ½-in. round Pickets, 40 inches high from ground at sides,	without Posts,	$33.00		$35.00
" " " ½ " " " 40 " " " "	with "	45.00		47.00
" " " ⅝ " " " 46 " " " "	without "	36.00		38.00
" " " ⅝ " " " 46 " " " "	with "	50.00		52.00

Arch extra according to lettering and width required from $35.00 to $50.00.

Any other Posts shown with Fences can be substituted for Posts illustrated above. Single Gates can be furnished on one or both sides of Double Gate. Other designs furnished free upon application. Correspondence solicited.

No. 291½ CEMETERY OR PARK ENTRANCE GATES WITH ARCH.

Walk Gates can be placed on one or both sides of Drive Gate. Gates can be fitted to fasten to stone posts if preferred. Other designs furnished on application. Write for prices and particulars.

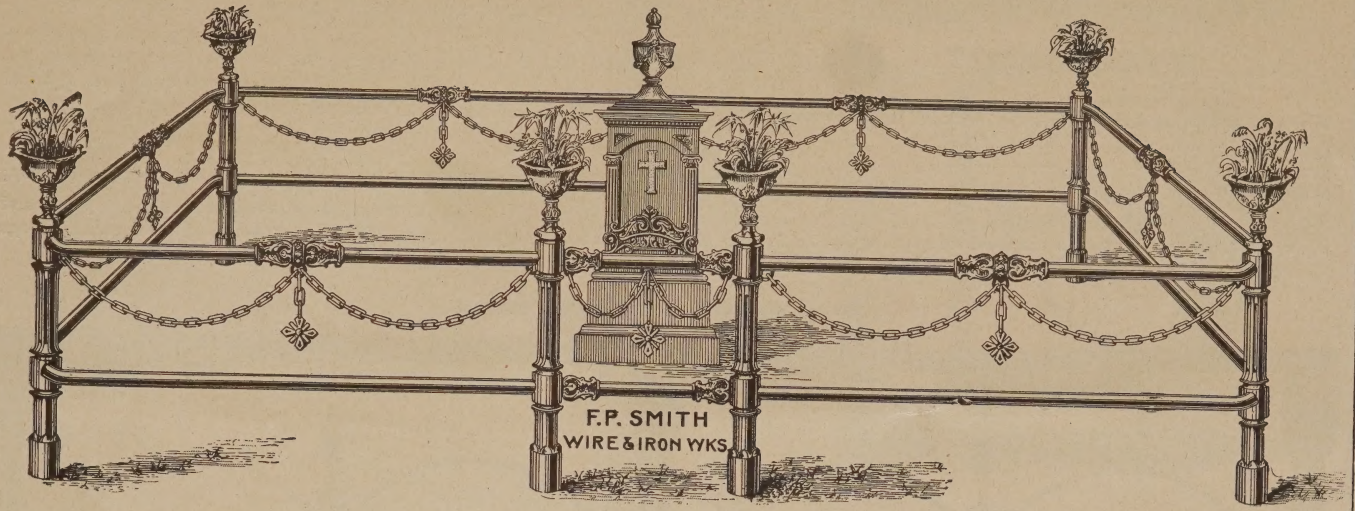


No. 292 Park or Cemetery Entrance Gate.

Walk Gates to correspond, if desired. Can be used with Iron Posts. Many other designs to select from. Inquiries cheerfully and promptly answered.

Copyright 1909 by F. P. Smith

TUBULAR CEMETERY FENCES, GRAVE GUARDS, ETC.

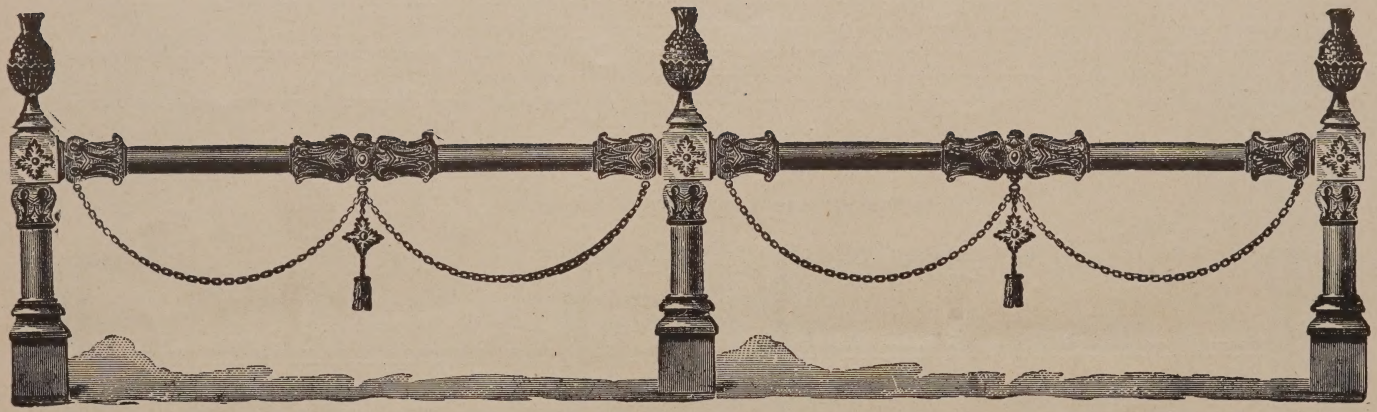


No. 304 Pattern Tubular Cemetery Fence.

This is a new design especially adapted for persons desiring an ornamental, inexpensive enclosure. Ball tops can be substituted for the vases on top of posts if preferred.

Made with 1⅛-in., outside diameter, tubular rails, painted black	per lineal foot,	$ 1.30
" " " " " galvanized	"	1.85
Entrance Gate Movable Bar, as in cut, painted, extra		3.00
" " " " " galvanized, extra		5.00
Name lettered on arch, extra		2.00

Swinging Gates can be furnished if preferred for $5.00 above price of Movable Bar Gates. Small enclosures for single graves can be made from this design. Write for prices. Send for special catalogue of Cemetery Fences, showing many attractive designs.



No. 306 Pattern Tubular Cemetery Fences.

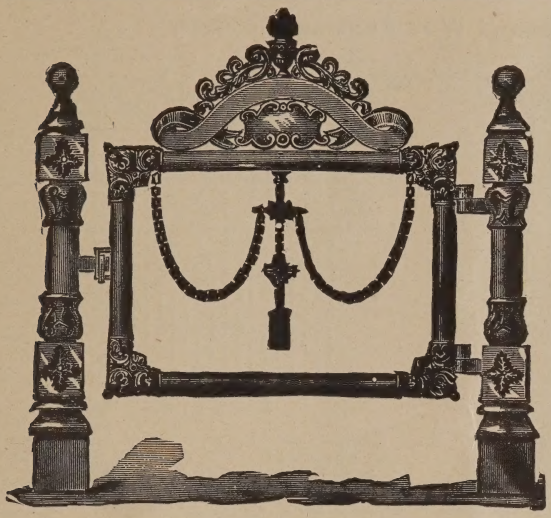
This is a new pattern for cemetery lots. It can be made with or without the chain and tassel ornaments as may be desired. The posts and foundations are cast in one piece, so that the height of the rail above ground can be regulated by the depth which the posts are set. In small cemetery lots the gate should be put at one corner to avoid short panels.

Price made with 1½ inch (outside diameter) tubular bar, including posts, all complete as shown in cut, painted black.....per lineal foot, $2.25
" " 2 " " " " " " " " " 2.75
" " 2 " " " " and ornaments, all galvanized, " " 3.75

If wanted without the chain and tassel ornaments, deduct 35 cents per lineal foot from the above prices. No. 348 tubular gate upon next page is generally used with this fence.

The Tubular Fences shown on pages 23, 24 and 25 can be made, if preferred, with square tubing set edgewise, instead of the round tubing shown in the cuts; prices quoted on application.

We have also many other designs of Cemetery Fences, which we will be pleased to send to interested parties on request.



No. 348 Tubular Cemetery Gate.

For 3½ feet opening, 1½ inch diameter tubular bars, without posts, painted, each.....$13.50

For 3½ feet opening, 2 inch diameter tubular bars, without posts, painted, each..... 15.00

For 3½ feet opening, 2 inch diameter tubular bars, all galvanized, without posts, each.. 21.00

If wanted with iron posts similar to those shown in cut, $15.00, and with galvanized posts, $20.00 additional.

The above gate is used with No. 306 Fence, and for Entrance Gates also. Any name can be lettered in arch, costing a trifle extra.

The design makes a heavy, massive Gate and adds greatly to the appearance of any enclosure.

PRICE LIST OF PARTS OF TUBULAR FENCES.

Cemetery Fences for sale in parts, as per price list below, thus affording an opportunity of substituting marble in place of cast posts.

		Black.	Galvanized.

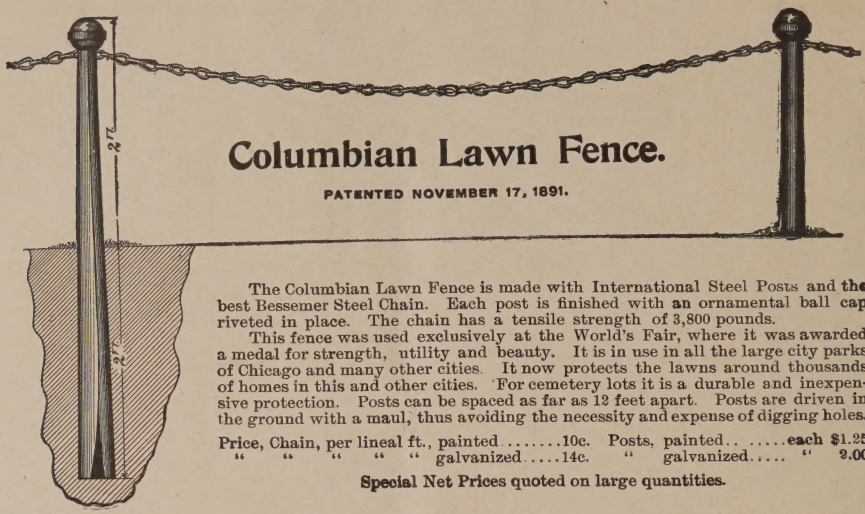
All above prices include Wrought Iron Foundation Posts.



Columbian Lawn Fence.

PATENTED NOVEMBER 17, 1891.

The Columbian Lawn Fence is made with International Steel Posts and the best Bessemer Steel Chain. Each post is finished with an ornamental ball cap riveted in place. The chain has a tensile strength of 3,800 pounds.

This fence was used exclusively at the World's Fair, where it was awarded a medal for strength, utility and beauty. It is in use in all the large city parks of Chicago and many other cities. It now protects the lawns around thousands of homes in this and other cities. For cemetery lots it is a durable and inexpensive protection. Posts can be spaced as far as 12 feet apart. Posts are driven in the ground with a maul, thus avoiding the necessity and expense of digging holes.

Price, Chain, per lineal ft., painted .....10c. Posts, painted.. .....each $1.25
" " " " " galvanized.....14c. " galvanized..... " 2.00
